

Picker Manual (Stupid Simple)

Your job

- Pick paid orders.
- Record actual picked quantity per line.
- Mark ready for dispatch, or flag exception.

The screenshot displays the POS AWESOME interface for a picker. The top navigation bar includes a menu icon, the logo, and user information (Cloud Online, PJ7 CASHIER, MENU). The main area is divided into two panels. The left panel, titled 'Picker Queue', shows a list of orders with filters (All, Pending, In Progress, Exception, Picked Ready) and a search bar. The right panel, titled 'Fulfillment Detail', provides a comprehensive view of a selected order, including its LSR, SO, and customer information, along with a phase timeline and a table of line items. The line items table includes columns for Item, Ord Qty, UOM, Conv, Ord Stock, Picked Qty, and Picked Stock. The bottom right section contains a 'Notes' field, a 'Pick History' log, and a 'Dispatch + Sync' button.

Picker Queue

PJ7 CASHIER

DETAILED SIMPLE Detailed view (default)

Paper-first picking with line-wise edits for exceptions. Picked qty defaults to ordered qty and keeps order UOM/conversion factor.

Search LSR / SO / customer

Dispatch + Sync

Run dispatch monitor

Picker screen

When you do what

1. Start of shift:
 - Open picker queue.
 - Focus `Pending` / `In Progress` rows.
2. During shift:
 - Open one queue row.
 - Update picked qty/status.
 - Save picking.
 - Mark ready when complete.
3. End of shift:
 - No order left half-done without notes.

Every button/field on picker screen

1. Refresh icon (top-right of queue card):
 - Reload queue and detail.
2. `DETAILED` / `SIMPLE`:
 - Change detail density.

- Use `DETAILED` for normal work.
3. Search field `Search LSR / SO / customer`:
 - Filter queue quickly.
 4. Filter chips: `All`, `Pending`, `In Progress`, `Exception`, `Picked Ready`:
 - Queue filter by status.
 5. Queue row:
 - Click row to load full order detail.
 6. `MARK ALL PICKED`:
 - Set all line picked qty = ordered qty.
 7. `START/SAVE PICKING`:
 - Save current line edits in progress.
 8. `MARK PICKED READY`:
 - Mark ready for dispatch.
 - Use only when all lines are properly picked.
 9. `FLAG EXCEPTION`:
 - Send row to exception state when mismatch/short pick/damage.
 10. Line table fields:
 - `Picked Qty` input: enter actual quantity.
 - `Status` dropdown: line status (`NOT\_PICKED`, `PICKED`, `PARTIAL`, `EXCEPTION`).
 11. `Picker notes`:
 - Explain partial pick or exception reason.
 12. Left ticket icon + monitor controls:
 - Cross-role visibility of pending workflow.

Non-negotiable rules

- Picker does not collect payment.
- Picker does not release goods.
