

Dispatch Manual (Stupid Simple)

Your job

- Verify picked-ready orders.
- Capture release proof.
- Release goods, or flag mismatch.

The screenshot displays the POS AWESOME interface, divided into two main sections: the Dispatch Queue on the left and the Fulfillment Detail on the right.

Dispatch Queue (Left Panel):

- Header:** POS AWESOME, PJ7 CASHIER, MENU.
- Dispatch Queue:** Includes tabs for DETAILED and SIMPLE. A note states: "Paper-first picking with line-wise edits for exceptions. Picked qty defaults to ordered qty and keeps order UOM/conversion factor." It shows 4 Ready, 0 Picking, and 2 Exceptions items. Metrics include Avg Wait (Ready) at 1d 8h, Oldest Open at 3d 20h, and Over SLA at 5.
- Search:** A search bar for LSR / SO / customer.
- Item List:** A list of items with columns for LSR, Item Name, Status, SLA, and Price. Items include RETAIL PJ7 WALK IN, LSR-PJ7 -20260227081502-792FD7, and others.

Fulfillment Detail (Right Panel):

- Header:** LSR-PJ7 -20260227081502-792FD7, Total: \$ 1,350.0000, Created: 27-02-2026, Updated: 27-02-2026, Released By: -, Released At: -.
- Phase Timeline (Dispatch Monitor):** Shows Current Phase (Picked Ready For Release), Current Phase Age (3d 20h), Open Age (3d 20h), and SLA (SLA: High).
- Release Goods:** Includes a table for Line Items with columns for Item, Ord Qty, UOM, Conv, Ord Stock, Picked Qty, Picked Stock, and Status. The table shows items like W80C, GROOVE, JOINT, and PLIERS.
- Dispatch Release Proof:** Includes fields for Acknowledged By (required), Proof Mode (required), Counter pickup, Reference No (optional), and Proof Notes (optional).

Dispatch screen

When you do what

1. Start of shift:
 - Open dispatch queue.
 - Prioritize `Dispatch Ready` and SLA-high rows.
2. During shift:
 - Open row.
 - Fill proof fields.
 - Release goods.
 - If mismatch: flag mismatch with reason.
3. End of shift:
 - No release without proof.
 - Hand over unresolved mismatches.

Every button/field on dispatch screen

1. Refresh icon:
 - Reload queue and details.
2. `DETAILED` / `SIMPLE`:

- `DETAILED` recommended.
3. Search field `Search LSR / SO / customer`:
 - Filter queue.
 4. Filter chips (`All`, `Dispatch Ready`, etc.):
 - Focus correct rows.
 5. Queue row:
 - Load order in detail pane.
 6. Queue metrics cards (`Ready`, `Picking`, `Exceptions`, `Avg Wait`, `Oldest Open`, `Over SLA`):
 - Prioritization dashboard.
 7. `RELEASE GOODS`:
 - Final dispatch action.
 - Enabled only when release gate passes.
 8. `FLAG MISMATCH`:
 - Return row to picker exception flow.
 9. `Allow partial/exception release` checkbox:
 - Allow release from exception states per supervisor policy.
 10. Dispatch Release Proof fields:
 - `Acknowledged By (required)`
 - `Proof Mode (required)`
 - `Reference No (optional)`
 - `Proof Notes (optional)`
 11. Dispatch Mismatch fields:
 - `Reason Code`
 - `Reason Details`
 - `Requires cashier adjustment`
 12. `Dispatch notes`:
 - Add action notes for audit.
 13. Left ticket icon + monitor controls:
 - Read-only workflow visibility.

Non-negotiable rules

- Never release goods without proof.
- Never bypass mismatch reason capture.
- Dispatch does not take payment.
