

POS Process Overview (All Roles)

One-line process

Sales Associate creates token -> Cashier takes payment -> Picker picks -> Dispatch releases -> Supervisor handles exceptions/overrides.

Role ownership

1. Sales Associate:

- Cart + token creation.
- No cash shift amounts, no payment, no release.

2. Cashier:

- Opening cash shift amounts.
- Select S.O + payment submit.

3. Picker:

- Line-wise picking updates.
- Pick ready / exception.

4. Dispatch:

- Release proof capture.
- Release goods or mismatch return.

5. Supervisor:

- Exception governance.
- Controlled partial/exception releases.

Handoff checkpoints

1. SA -> Cashier:

- Token/SO must exist and customer sent to cashier.

2. Cashier -> Picker:

- Payment submitted.
- Row appears in fulfillment queue.

3. Picker -> Dispatch:

- Pick complete and status ready, or exception documented.

4. Dispatch -> Customer:

- Proof captured and status released.

5. Any role -> Supervisor:

- Exception, mismatch, or blocked action.

Required operational rules

1. SA never enters opening shift money.

- 2. Cashier owns opening/closing cash accountability.
- 3. Dispatch release requires proof (`Acknowledged By` + `Proof Mode`).
- 4. Mismatch requires reason and correct routing.
