Exact buttons you need to know

1. `Select S.O`
 - What it does: opens Sales Order selection.
 - When to click: first step when customer gives token.
2. `PAY`
 - What it does: opens payment panel.
 - When to click: after loading correct Sales Order/cart.
3. Payment mode buttons (example: `Cash`, `Card`, `Cheque`, `Bank`, or configured mode names)
 - What they do: set the full amount to that payment mode row.

- When to click: choose how customer is paying.
4. `Request` (phone payment mode only, if configured)
 - What it does: sends payment request to customer phone.
 - When to click: only for phone payment process.
 5. `Get Payments <Mode>` (M-Pesa style mode only, if configured)
 - What it does: fetches mobile payments.
 - When to click: only for that payment integration.
 6. `Submit`
 - What it does: submits invoice without auto-print.
 - When to click: normal completion when payment is correct.
 7. `Submit & Print`
 - What it does: submits invoice and prints.
 - When to click: if customer needs printed slip now.
 8. `Cancel Payment`
 - What it does: exits payment panel and returns to invoice/cart view.
 - When to click: wrong amount entered or wrong order loaded.
 9. `Cancel`
 - What it does: cancels current cart.
 - When to click: wrong order loaded and you want to restart.
 10. `Save/New`
 - What it does: saves and starts a new cart/token style flow.
 - When to click: only for approved direct sale flow.
 11. `Held`
 - What it does: opens held drafts.
 - When to click: only if manager asks to resume held draft.
 12. `Return`
 - What it does: opens return invoice flow.
 - When to click: when processing approved customer return.
 13. `Print Draft`
 - What it does: prints draft invoice.
 - When to click: only if store process asks.
 14. Order Monitor ticket icon
 - What it does: opens order monitor panel.
 - When to click: check pending queue and handoff status.
 15. `All (date)` / `Mine` / refresh in order monitor
 - What they do: filter and refresh queue rows.

- When to click: use after submit to confirm flow moved forward.

Step-by-step (daily token flow)

1. Ask customer for token slip.
2. Click `Select S.O`.
3. Search and load correct order.
4. Click `PAY`.
5. Click payment mode button.
6. Check `To Be Paid` is zero.
7. Click `Submit` or `Submit & Print`.
8. Confirm success message and invoice number.
9. Direct order to picker/dispatch process.

Do not do these

- Do not bypass payment mismatch.
- Do not release goods.
- Do not override exception without supervisor.

If something breaks

1. Do not click submit many times.
2. Copy order number and timestamp.
3. Call supervisor immediately.
