

# Supervisor Manual (Very Simple)

## What your job is

Your job is:

- Resolve exception rows.
- Approve or reject partial/exception release.
- Keep clean notes and audit trail.

Supervisor screen

## When you do work

- Start of shift: check exception queue first.
- During shift: support picker/dispatch when blocked.
- End of shift: no open exception without clear note.

## Exact buttons and controls you need

You can see both picker and dispatch controls.

1. Refresh icon
  - Reloads queue and detail.
2. `Detailed` / `Simple`
  - Switches detail depth.
3. Search box and filter chips
  - `All`, `Pending`, `In Progress`, `Exception`, `Picked Ready`, `Dispatch Ready`.
4. Picker action buttons
  - `Mark All Picked`

- `Start/Save Picking`
- `Mark Picked Ready`
- `Flag Exception`

#### 5. Dispatch action buttons

- `Release Goods`
- `Flag Mismatch`
- `Allow partial/exception release` (checkbox)

#### 6. Dispatch proof and mismatch fields

- `Acknowledged By (required)`
- `Proof Mode (required)`
- `Reference No (optional)`
- `Proof Notes (optional)`
- `Reason Code`
- `Reason Details`
- `Requires cashier adjustment`

#### 7. Notes fields

- `Picker notes`
- `Dispatch notes`

#### 8. Order Monitor ticket icon and panel controls

- Monitor all pending rows and handoff progress.

## Supervisor decision rules (simple)

1. Full pick, no mismatch:
  - allow normal dispatch release.
2. Pick exception, but release is still acceptable by policy:
  - check `Allow partial/exception release`, then release with full notes.
3. Financial mismatch:
  - require cashier adjustment first.
4. Missing proof:
  - do not release.

## Step-by-step for exception row

1. Filter `Exception`.
2. Open row.
3. Read line qty and notes.
4. Decide: return to picker or allow controlled release.
5. Record clear note and reason.

6. Confirm final status in detail panel.

## **Do not do these**

- Do not approve exception with no reason.
- Do not ignore mismatch details.
- Do not leave row unresolved with no handoff note.

## **If something breaks**

1. Refresh and re-open row.
2. Record LSR and error text.
3. Escalate to IT/Codex support path.
