

Picker Manual (Stupid Simple)

Role sanity (must be true)

- Your only operational role is `cline-Picker`.
- If you see "multiple operational roles", stop and call supervisor/admin.

Your job

- Pick paid orders line by line.
- Save real picked quantity.
- Mark ready for dispatch or flag exception.

The screenshot displays the POS AWESOME Picker interface. On the left, the 'Picker Queue' shows two orders: 'RETAIL PJ7 WALK IN' and 'RETAIL PJ7 WALK IN'. The main area, 'Fulfillment Detail', shows order information for LSR-PJ7-20260227081502-792FD7, including total amount, creation date, and a warning: 'Source Sales Order age exceeds profile max lookup age. Age: 3 day(s)'. Below this is a 'Phase Timeline (Dispatch Monitor)' with fields for Current Phase, Current Phase Age, Open Age, and SLA. A table of 'Line Items' follows, with columns for Item, Ord Qty, UOM, Conv, Ord Stock, Picked Qty, Picked Stock, and Status. The first item is 'W80C 8" GROOVE JOINT PLIERS' with an ordered quantity of 1.00000 and a picked quantity of 1. On the right, there are sections for 'Notes' and 'Pick History'.

Item	Ord Qty	UOM	Conv	Ord Stock	Picked Qty	Picked Stock	Status
W80C 8" GROOVE JOINT PLIERS	1.00000	Nos	1.000000	1.00000	1	1.00000	PIC

Picker screen

When to do what

1. Start of shift:
 - Open Picker Queue.
 - Start from oldest `Pending` or `In Progress`.
2. During shift:
 - Open queue row.
 - Enter picked qty per line.
 - Click `Start/Save Picking`.
 - Click `Mark Picked Ready` when complete, else `Flag Exception`.
3. End of shift:
 - No open partial pick without notes.

Every visible button/field on picker screen

1. Refresh icon: refresh queue and detail.
2. `DETAILED` / `SIMPLE`: view mode toggle.
3. `Search LSR / SO / customer`: queue search.
4. Filter chips `All`, `Pending`, `In Progress`, `Exception`, `Picked Ready`: status filter.
5. Queue row card: load order detail.
6. `MARK ALL PICKED`: set picked qty equal to ordered qty for all lines.
7. `START/SAVE PICKING`: save line edits as in-progress.
8. `MARK PICKED READY`: send to dispatch-ready state.
9. `FLAG EXCEPTION`: set pick exception status.
10. Line table:
 - `Picked Qty` input: actual picked qty.
 - `Status` column: per-line pick status.
 - `Ord Qty`, `UOM`, `Conv`, `Ord Stock`, `Picked Stock`: reference fields.
11. `Picker notes`: reason/context for exceptions and partials.
12. Pick History: audit trail of pick actions.
13. Dispatch + Sync panel: read-only state visibility.

Edge cases you must follow

1. If only `Picked Ready` or `Exception` rows are left, do not force-edit blindly. Review notes and escalate to supervisor if unclear.
2. Never mark ready if any line is wrong or missing.
3. Picker never takes payment and never releases goods.
