

Dispatch Manual (Stupid Simple)

Role sanity (must be true)

- Your only operational role is `cline-Dispatch`.
- If you see "multiple operational roles", stop and call supervisor/admin.

Your job

- Verify picked-ready rows.
- Capture release proof.
- Release goods or flag mismatch.

The screenshot displays the POS AWESOME Dispatch screen. On the left, the 'Dispatch Queue' section shows a list of items with columns for 'Ready', 'Picking', and 'Exceptions'. Below this, there are statistics for 'Avg Wait (Ready)', 'Oldest Open', and 'Over SLA'. A search bar is provided for 'Search LSR / SO / customer'. The main area shows a list of items with columns for 'Item', 'Ord Qty', 'UOM', 'Conv', 'Ord Stock', 'Picked Qty', 'Picked Stock', and 'Status'. The right side of the screen shows 'Fulfillment Detail' for a specific item, including 'LSR', 'SO/Token', 'Cloud St', 'Customer', and 'Cashier'. Below this, there are buttons for 'PICKED_READY_FOR_RELEASE', 'PENDING', 'SALE_SYNC_PENDING', and 'State'. A 'Phase Timeline (Dispatch Monitor)' section shows 'Current Phase', 'Current Phase Age', 'Open Age', and 'SLA'. A 'Dispatch Release Proof' section includes fields for 'Acknowledged By (required)', 'Proof Mode (required)', 'Counter pickup', 'Reference No (optional)', and 'Proof Notes (optional)'. A red note at the bottom states 'Release requires Acknowledged By and Proof Mode'.

Dispatch screen

When to do what

1. Start of shift:
 - Open dispatch queue.
 - Prioritize oldest and SLA-high rows.
2. During shift:
 - Open row.
 - Fill proof fields.
 - Click `RELEASE GOODS`.
 - If mismatch: fill mismatch reason and click `FLAG MISMATCH`.
3. End of shift:
 - No row released without proof.
 - Escalate unresolved mismatches.

Every visible button/field on dispatch screen

1. Refresh icon: refresh queue/detail.
2. `DETAILED` / `SIMPLE`: view mode.
3. Queue search `Search LSR / SO / customer`.
4. Filter chips (`All`, `Dispatch Ready`, `Pending`, etc.).
5. Queue metrics cards (`Ready`, `Picking`, `Exceptions`, `Avg Wait`, `Oldest Open`, `Over SLA`).
6. Queue row card: load selected order.
7. `RELEASE GOODS`: final release action.
8. `FLAG MISMATCH`: return row to mismatch/exception flow.
9. `Allow partial/exception release`: allows release of exception rows (policy controlled).
10. Release proof fields:
 - `Acknowledged By (required)`
 - `Proof Mode (required)`
 - `Reference No (optional)`
 - `Proof Notes (optional)`
11. Mismatch fields:
 - `Reason Code`
 - `Reason Details`
 - `Requires cashier adjustment`
12. `Dispatch notes`: audit notes.
13. Dispatch + Sync history: event/outbox visibility.

Edge cases you must follow

1. `RELEASE GOODS` stays disabled until required proof fields are filled.
2. If `FLAG MISMATCH` does not update status within a few seconds, escalate to supervisor immediately.
3. Dispatch never takes payment and never edits opening cash.
